Subject: Tihiro's Passing

Dear Yoko,

To me, Tihiro was a great leader and ball of energy and spirit. He hired me into General Atomics in 1975, and built up our fusion energy research effort to something we all are proud of. And between his many enthusiastic and often enlightened ideas, he still had time for great fun, such as playing soccer against Princeton even when he was a little over the hill, and throwing great GA parties down on San Diego bay. It makes me smile to think of him. I owe a lot to him. My condolences, and also those from Maura, my wife, for the loss of such an exciting center in your life.

Yours sincerely,

Bob and Maura Harvey
