Subject: My Sympathy for Tihiro's Passing

Dear Mrs Ohkawa

It is with great sadness I learned of Tihiro's death. He was truly a one-of-a-kind scientist and leader. I worked with him at General Atomic's in the 80's & 90's having been in DIII-D and his "GA Institute" under his guidance. He was an inspirational leader and I owe much of my exploratory characteristics to his guidance.

I am retired for GA now but, like Tihiro, I continue to explore areas of physic research.

My best wishes to you and your family.

Jim A. Leuer
